SEALX Technologies Pvt. Ltd.

SEALX TECHNOLOGIES PVT.LTD. is specialist for design, production and distribution of Hydraulic and Pneumatic sealing elements as well as technical rubber parts and offering consulting services before/after sales. Besides its wide range of standardized profiles, SEALX also manufactures custom made sealing elements within the customer specifications ensuring the quality and traceability.

SEALX Offer's a complete Range of Seals, Seals Tools & Accessories:

- Standard hydraulic seals produced by injection molding
- O-Rings, Radial Shaft seals & Mechanical Seals
- Machine seals using semi finished ingots
- Seal kits and repair kits
- Accessories for assembling, dismantling and measuring
- Bespoke and standard sealing solutions
- Just-in-time manufacturing of CNC turned seals up to 2000 mm in diameter
- Delivery at short turnarounds
- After-sales and maintenance support

The main production program both for Hydraulic and Pneumatic group covers Piston Seals, Rod Seals, Wipers and Guide Rings. SEALX also manufactures Special Chevron Packings for high and low pressure applications. Besides the above mentioned items, SEALX is also serving imported products such as O-Rings, O-Ring Kits, O-ring Cords, X-Rings, Bronze filled PTFE and Phenolic Fiber Guide Rings.
